

Medzinárodný projekt eTwinning 2021- 2022

Na úvod projektu si mali študenti všetkých zúčastnených škôl vymyslieť **vlastné logá** projektu. Každý vložil svoje nápady na platformu padlet.com, z ktorých sme spoločne vybrali 1 logo ako oficiálne logo projektu. Tu sú nápady na logá od našich žiakov:

Mali sme mnoho nápadov na logá, z ktorých napokon zvíťazilo na základe hlasovania nasledujúce logo:

Ďalšou z úvodných aktivít bolo **predstavenie sa študentov a škôl**. Žiaci mali v krátkosti predstaviť samých seba a svoju školu. Tu sú niektoré príklady na predstavenie sa našich žiakov...

ĎALŠIE AKTIVITY A DISKUSIE NAŠICH ŽIAKOV V PROJEKTE:

Technológie a využívanie IT zručností

The most important technological device

The most important technological device for me is my phone because since I can contact my family and friends it's easier. We can use phones to do things like working but also like a rest thing. Everybody has a lot of things on their phones. For example: listen to music, take pictures, search for information and a lot more. In these times I can't imagine living without them. My opinion is that phones are necessary and often practical in life.

Soňa, Slovakia

The most important device

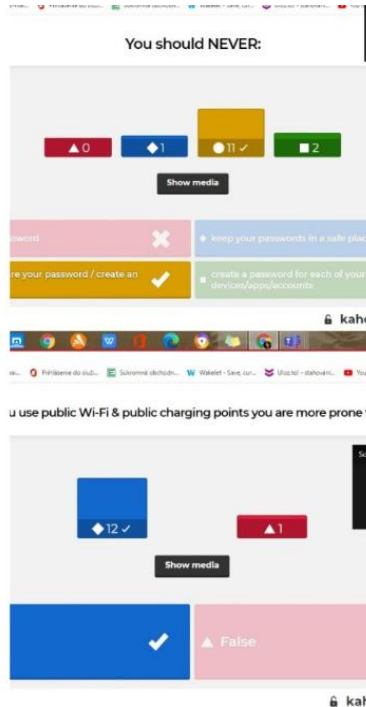

I think the most important device is a printer. We wouldn't be able to communicate without it. Our life would be harder.

Vanesa, Slovakia

The most important technological device

For me, the most important technological device is my phone. Nowadays, using a phone can do everything. I can't imagine life without a phone because it connects me with my friends who are far from me. The phone is also used as a machine for communication, photography, writing notes, storing files etc.
